LOCAL COUNTY GOVERNMENT.

The veto by Governor Budd of the The velo by Governor bank or the county government act passed by the legislature brings into force again the act of 1893, which divides the counties of California into fifty-five classes, and provides inequalities and uncertainties nuch to keep its provisions perez nially before the courts in some thans o other, and those who have to deal with it in a constant state of doubt as to what they are and are not empowered to do especially in the matter of providing deputies to perform the services necessary to transact the public business.

he failure of the legislature to pass a bill which would stand gubernatorial scrutiny will again bring to the public enment, viz.: the exercise of the powe various counties of regulating by the various counties in regularing, their own affairs so far as the fixing of salarles, employment of deputies, etc., are concerned, and relieving the legislature of those functions. It seems likely that it will have to come to this. The legislative method has proven to be very mentisfactory, if not an absolute failure. Local regulation could hardly be worse, and the probabilities are that it would

mould have to provide such general reg-ulations for the counties as would pro-vide against conflict with the functions elato,and it might be a wise provie ion to set up a limit beyond which a county could not go in the creation of public expense. In most counties there would be no necessity for this limitation, but experience has demonstrated t in some localities, where cities are

ays:

The Expositor knows that the city narshal cannot appoint a police force on the Expositor urges the voters of reamont electa board of city trustees whor ill electa a police force which will work that a police force which will work that harmony with a city marshal, rather han a force which will dely a city marshal and hold itself responsible only to tity trustees.

in larmony with a city marshal, rather than a force which will defy a city marshal and hold iteel responsible only to city trustees.

No, the olty marshal has not the appointing of the police force, but it is not only his privilege, but his duly, to report to the trastees any member of the force who fails or refuses to do his duty as directed by the law and the marshal's instructions. The marshal has not authority to direct them in their duties and to request their discharge for dereliction. That is a power, if properly directed, which will make it extremely unpleasant for any policeman who refuses to do his duty, and while it does not make the marshal the absolute master of the situation, it does make him a very potent factar in the management of the force. The statement that the marshal is powerless to recurre enforcement of the law is the veriest boah. As a matter of fact, he can compel the enforcement of the law if he sees fit to do so. A bound of trustees which would resist that officer in the performance of his duty would speedily find itself as completely under the has of typic disapproval as was the Triangle in its palmiest days.

Ture Repression and Populist there is greater disgrace in the good men of the Democratic and Populist for its race than the resulting and itself as completely under the has of typic disapproval as was the Triangle in its palmiest days.

pointments were dixided and Mesers, Relation and Briwn were selected to currel the votes with the single object of purification. It is now in order for the Expositor to relate how rapidly the city has degenerated and drifted into prolifery extravagance and vice since it was deprived of the services of the late Democratic administration. It is must be admitted, though, that the cdirection were reserved in the late of the contemporary has not real. torial staff of the contemporary has not been hunted with a shotgun since the Republicans came into power.

A CORRESPONDENT who signs himself "Republican and Catholic" says that the Republican nomines for city recorder is a member of the A.P.A., and that is a member of the A.P.A. and the while he, the correspondent, is in the habit of voting a straight ticket, he will have to make an exception in this instance. It is hard to see how our dissatisfied correspondent will be able to metiafy himself in this case. It so happene that both the Populist Democratic for the recordership are also members of the A.P.A., and nothing would be mained from the standpoint of opposition to that order by voting for either of them The Republican nominee is well quali-Sed for the place, and it is a well known fact that he was nominated on his mer-its, and not because of his affiliation

with any order.

Thomas A. Edison says that he is going to improve that wonderful invontion, the phonograph, and so chenpen it that every family may have its own instrument. He will have it render whole opens and read entire books; so he says. If it is to do this, may the Lord grant that it shall be decidedly improved over its present condition. It needs a new heart, but if it cannot be aiven it, it should have a new larnys. tion, but experience has demonstrated that in some localities, where cities are the dominant power in county government, it is not safe to put implicit confidence in capacity for honest local government.

A change from the present system to a system of local management would relieve the legislature of the perplexing and time-consuming questione relative to county government that are brought before it each session, and would give it that much more time in which to deal with measures that more properly belong to etate government. We believe this will be one of the live issues before the west legislature, and it would be well for the voters and taxpayers to give the subject some thought in the meanstime.

The Expositor knows that the city marshal cannot appoint a police force but the Expositor urges the voters of Fremoto elect a board of city trustees who will select a police force which will defy a city marshal and hold [teelf responsible only to city trustees.]

AT THE BARTON.

"The Fencing Master," DeKoven & Smith's Charming Opera.

To the Barton opera house tomorrow night comes the most successful of all American comic operas. In every way it is as well nigh perfect as art and money can maked.

The stage pictures of the "Fencing Master" are inspired by an earnest effort to give to the opera its true Italian setting. The scale painting is all that could be desired. It surpasses any production of the season. The first scone, which is in Milan, reveals a large and imposing view of the celebrated. Milan cathedral. In the second scene a distant view of some of the most magnificent of the Ventian places is shown beyond a middle ground of deep blue sen. The last scene shows an Italian villa and is exceedingly heartful.

The company is a choice one and renders in excellent syle the lexurious muste of DeKovon. Miss Dorothy Martin is the chief attraction of the performance. She presents the leading sormo character, Francesar, The Fencing Master. Her voice is clear, full, flexible, of great range and perfectly undercontrol.

In the laws of nature an excuse is found for the existence of every species of plant, factor or being. So it is in overything. In the political balliwick of Freano there must be some excuss for this hybrid tieset.

But there are issues involved in the present contest which have not appeared on the surface set. There is known to be a fare game rule upon the present of the law to people of the city. He stated that the gold was brought to his store by squaws and given to him in exchange for provisions and elotting. The gold was found in the guilles about Coarse Gold. This is the only kind of currency the Indians possees. Whenever, the Indians want some food or clothes they go out into a gully and scrape up a little gold which has been washed down by the streams or by the rains. Mr. Kroin says that the statement that gold can be picked up about Coarse Gold is literally true.

EMILY BANCKER'S COMPANY.

The Story Upon Which the Bright
Comedy "Our Flat" Was Built.

Much interest is manifested in the appearance of Emily Bancker and her
company, known as the leading exponouts of polished light comedy on the
American stage, at the Barton operahouse next Monday night. Miss Binneker and company plays Fresso directly
following their most successful engagement at the Oslifornia theater.

The play, "Our Flat," in which this
organization will be seen, is the comedy
now rounting at the Slandard theater,
London, and is an immense success
there, its dislogue is bright, the construction admirable; in briel, the story
is this:

struction admirable; in briel, the story is this:

A young and newly married couple ure living in the top flat of an expensive apartment house. Their farmiture is all purchased on the installment plan, and, is they have no money with which to pay their bills, they are besieged by oreditors of all descriptions, among whom are the furniture people, who strip the flat of overything except the piano, which happens to have been a present. There is absolutely nothing left to sit on, whereupon the young wite gathers together all the old boxes, empty wacking cases and kitchen utensils, out of which she improvises some very beautiful and artistic furniture. The action is rapid, never lags, and in the hands of the clever company who present it, it is said to create an incessant uproar of langiture from the opening till the final scene. Much is promited the the management in the way of solid lun, good singing, strong specialties, handsome scenery and effective costumes.
